

Customer

dj Orthopedics is a global medical device company specializing in rehabilitation and regeneration products for the non-operative orthopedic and spine markets. The company's broad range of over 600 rehabilitation products including rigid knee braces, soft goods and pain management products, are used to prevent injury, treat chronic conditions and aid in recovery after surgery or injury. The company's regeneration products consist of bone growth stimulation devices that are used to treat nonunion fractures and as an adjunct therapy after spinal fusion surgery.

Walter Tsao - Director of Operations-dj Orthopedics LLC

"We were able to accommodate more people in the same space without sacrificing desk workspace. This allows us flexibility with our changing business requirements. We have the ability to communicate much better both visually and verbally. We are very pleased with the overall aesthetics, the streamlined clean look and the comfort edge is huge!"

The Need

It takes more than a new mission statement to change a company culture. dj Ortho's goal to become #1 in non-surgical prevention, treatment and rehabilitation for orthopedic and spinal medical devices also required a cure for the common cubicle. To capitalize on their collective expertise, dj Ortho employees needed to work together, sharing their knowledge to broaden each person's base of expertise. However, the walls of conventional office spaces slowed the flow of fresh ideas. Now driven by urgency, accountability and continuous improvement, dj Ortho needed a workplace powered by the energy of creative collaboration.

izzy's Solution

With the help and intimate knowledge of their client's needs, Innerspace Systems, Inc. worked with izzydesign to create the perfect solution for dj Ortho. To maximize worker efficiency, izzy recommended a minimal "parts and pieces" solution, providing each person with a spacious, seamless six-foot corner worksurface and high-performance, mesh-backed chair. Files fit underneath each table, while power and data access is just an arm's length away.

To promote collaboration, freestanding workstation clusters accommodate up to eight people, who enjoy their personal space while communicating easily over 42-inch high izzySmartScreens. The clean lines of izzy's Clara tables create a contemporary look. Trademark soft edges add comfort and ergonomic benefit!
